RIGID BAYS AVAILABLE BEFORE TRADE

The diagram is a detailed parking plan for Epping Market. It shows a complex layout of parking bays, roads, and market areas. Key areas labeled include 'FLOWER MARKET' at the top center, 'TRADING STANDS' in the middle right, and 'TRADING STORES' at the bottom center. The plan uses various colors and patterns to categorize parking bays: orange for semi-covered, green for rigid covered, light blue for one-sided rigid covered, purple for semi-uncovered, pink for one-sided semi-uncovered, dark blue for rigid uncovered, light blue for one-sided rigid uncovered, yellow for LCV covered, and brown for LCV uncovered. Diagonal hatching indicates rigid uncovered bays, and solid brown indicates semi-uncovered bays. Red stars mark rigid bays available before trade. The plan also shows loading and unloading zones and rear loading zones. The overall layout is rectangular with a central corridor and various parking areas around the perimeter and within the market blocks.
